NSTS - National Sprayer Testing Scheme Change is coming - are you in the know?

On the 26th November 2016 the NSTS testing legislation changed under the Sustainable Use Directive. All pesticide application equipment requires an NSTS test certificate. It will not just be machines working under Farm Assured or Red Tractor schemes but all self-propelled, trailed and mounted sprayers over 3 meters in width.

So why has this legislation changed?

Safety - to ensure all sprayers and agrochemicals are being used in a manner that is safe for the sprayer operator.

Reducing costs - Improving accuracy of pesticide application and reducing mid-season breakdowns.

Compliance - having your sprayer NSTS tested satisfies supermarket traceability demands.

Environmental Impact - make a positive contribution to safeguarding our countryside.

C&O Tractors are committed to maintaining your machinery in the best possible condition, keeping you compliant and ensuring operator safety at all times. If you need any further information on NSTS testing contact your local service department.

Book your NSTS test with C&O Tractors
- prices from £8 per metre (+ travel time)
