WACKER NEUSON

ECO solutions from Wacker Neuson

zero emission

For maximum maneuverability.

Achieve much, work in an economical manner, while protecting the environment: the emission-free solutions from Wacker Neuson open up completely new potentials to you. These machines and units thus meet all exhaust emission regulations and even the most stringent tender criteria, e.g. for urban projects or for working indoors.

In addition, there is interesting potential for savings for you, because the operating costs are much lower than with fuel-powered models. This forward-looking product category can be found across our entire product range offer.

The emission-free solutions from Wacker Neuson:

- The world's first battery-powered rammers AS30e and AS50e
- The track dumper DT10e
- The wheel loader WL20e
- The power unit HPU8 for the tracked excavator 803 dual power

Flexibly switch to emission-free operation

- Two drive system options: Diesel- and electro-hydraulic drives
- Plug & Play: ready for use in a few easy steps
- 12 m hose for more freedom of movement

Benefit from an enormous range of applications.

- Long battery running time of 8 hours on average
- 3 powerful electric motors for both tracks and the work hydraulics
- Stable, even in a tilted position thanks to the low-mounted batteries

Efficient compaction without exhaust fumes.

- Up to 63% lower energy costs
- Temperature-resistant battery with a long service life
- The only rammer world-wide with 0% emissions

Perform fully electric transport work.

- Battery running time under full load of up to 5 hours
- Individual electric motors for drive system and work hydraulics
- Significantly reduced maintenance costs thanks to electric motors

Talk to C&O about ECO solutions;

Speak to our Parts departments about your Dowdeswell and Kuhn requirements. Quantity of Ransomes wearing parts also available subject to availability.

C&O Tractors Ltd NEWS

John Froud

After 49 years dedicated service to both C&O Tractors and Stanley Pond Ltd we are sorry to announce that John Froud is leaving the company. John's long service surpasses any other current team member at C&O.

During his years with the company John has become well respected by customers for his depth of knowledge and dedication to the job and is renowned for going above and beyond to ensure customers are back working as soon as possible. In spite of the massive changes in the ranges, technology and size of tractors that John has seen throughout his career he will admit that his favourite machines to work on are still the classic Ford tractors. 'We wish John well for the future. He will be missed in the Blandford workshop. Recent recruitment to the team at Blandford will ensure that we are able to keep supporting customers whenever and wherever you need us.' said Andy Coles, C&O Managing Director.
